ADDENDUM NO. 3
TO
PROJECT NO. TMUA-W 16-02 TO-05 & TO-6 City of Tulsa Storage Building and
Parking Facility S. Jackson Ave. and W. 25th St.

This Addendum No. 3 consisting of five (5) items, submitted by BKL Inc., is hereby made a
part of the Contract Documents to the same extent as though it were originally included
therein, and shall supersede anything contained in the Plans and Specifications with which it
might conflict. This entire Addendum shall be attached to the Index Sheet of the
Contract Documents, recorded on page P-6a of the proposal, and submitted with bid.
Failure to do so shall result in the bid being deemed non-responsive.

This Addendum No. 3 consists of the following:

The attached documents list the detail items that have been modified in Addendum
No. 3. These documents shall be inclusive and apply to this project.

All other provisions of the Plans and Specifications shall remain in full force and effect.

CITY OF TULSA,

[Signature]

Paul D. Zachary, P.E.
City Engineer

HAS/ML/TP/AT/kr
ADDENDUM NO. 3
TMUA-W 16-02 Task Orders 5 and 6
City of Tulsa Storage Building and Parking Facility
S. Jackson Ave. and W. 25th St.
February 26, 2021

NOTICE TO BIDDERS
This Addendum is issued to all registered plan holders pursuant to the Instructions to Bidders and Conditions of the Contract. This Addendum serves to clarify, revise, and supersede information in the Project Manual, Drawings, and previously issued Addenda. Portions of the Addendum affecting the Contract Documents will be incorporated into the Contract by enumeration of the Addendum in the Owner/Contractor Agreement. The date for receipt of bids is unchanged by this Addendum and is at same time and location. The Bidder shall acknowledge receipt of this Addendum in the appropriate space on the Bid Form.

CHANGES/CLARIFICATIONS TO SPECIFICATIONS
1. Specification 033000 Cast-In-Place Concrete
   - Revise 3.8. Finishing Floors and Slabs, B. 2. As follows:
     2. Finish and measure surface, so that Floor Flatness equals Ff 25 and Floor Levelness equals Fl 20 per ASTM E1155.

2. Specification 083323 Overhead Coiling Doors
   - Replace Specification in its entirety with revised attached Specification 083323.

3. Specifications 265119 and 265619
   - Triple C Lighting & Controls is an approved lighting provider.

CHANGES/CLARIFICATIONS TO DRAWINGS
4. Sheet
   - Replace Sheet 2 (Pay Quantities and Notes) in the plans with Revised Sheet 2 (Pay Quantities and Notes) included in the Addendum.
   - Replace Sheet 5 (Miscellaneous Details) in the plans with Revised Sheet 5 (Miscellaneous Details) included in the Addendum.
• Replace Sheet 6 (Miscellaneous Details) in the plans with Revised Sheet 6 (Miscellaneous Details) included in the Addendum.

• Replace Sheet 7 (Miscellaneous Details) in the plans with Revised Sheet 7 (Miscellaneous Details) included in the Addendum.

• Replace Sheet 8 (Drainage Area Map) in the plans with Revised Sheet 8 (Drainage Area Map) included in the Addendum.

• Replace Sheet 15 (Proposed Site and Striping Plan) in the plans with Revised Sheet 15 (Proposed Site and Striping Plan) included in the Addendum.

• Replace Sheet 16 (Prop Sign Locations) in the plans with Revised Sheet 16 (Prop Sign Locations) included in the Addendum.

CHANGES/CLARIFICATIONS TO BID FORM

5. DELETE the existing proposal in its entirety and replace with the attached revised Proposal and electronic media.
   • Revised Proposal can be found at:
     i. https://www.cityoftulsa.org/government/departments/engineeringservices/construction-bids/ for Project No. TMUA-W-16-02 TO-5 & 6
     ii. It is the bidder’s responsibility to download the revised Proposal onto their thumb drive.
     iii. Added pay items 14 & 42. Added “Add Alternate #1”. Increased construction days to 210.

ADDITIONAL QUESTIONS/RESPONSES

QUESTION: The Painting specification calls for “All exterior and interior exposed steel” to be painted. However, we found only notes on the drawings to paint the passage doors. Can clarify this for us?

RESPONSE: All exposed steel is to be painted per specifications, door schedule, and notes on sheet A2-03 (sheet 26).

END
SECTION 083323
OVERHEAD COILING DOORS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Insulated service doors.

1.2 ACTION SUBMITTALS

A. Product Data: For each type and size of overhead coiling door and accessory.

B. Shop Drawings: For each installation and for special components not dimensioned or detailed in manufacturer's product data.

1. Include points of attachment and their corresponding static and dynamic loads imposed on structure.
2. Show locations of controls, locking devices, detectors or replaceable fusible links, and other accessories.
3. Include diagrams for power, signal, and control wiring.

C. Samples: For each exposed product and for each color and texture specified.

1.3 INFORMATIONAL SUBMITTALS

A. Sample warranty.

1.4 CLOSEOUT SUBMITTALS

A. Maintenance data.

1.5 QUALITY ASSURANCE

A. Installer Qualifications: An entity that employs installers and supervisors who are trained and approved by manufacturer for both installation and maintenance of units required for this Project.

B. Accessibility Standard: Comply with applicable provisions in the USDOJ's "2010 ADA Standards for Accessible Design" and ICC A117.1.
1.6 WARRANTY

A. Special Warranty: Manufacturer agrees to repair or replace components of doors that fail in materials or workmanship within specified warranty period.

1. Warranty Period: Two years from date of Substantial Completion.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Structural Performance, Exterior Doors: Capable of withstanding the following design wind loads:

1. Design Wind Load: As indicated on Drawings but no less than Uniform pressure (velocity pressure) of 20 lbf/sq. ft., acting inward and outward.
2. Testing: According to ASTM E 330/E 330M.

2.2 DOOR ASSEMBLY

A. Approved Manufacturer and Product: (Addendum 3)
   1. Overhead Door Corp., 2501 S. State Hwy 121 Suite 200 Lewisville, Tx
      a. Overhead Coiling Stormtite Insulated Service Doors: Series 625

B. Uninsulated service and (Addendum 3) Insulated Service Door: Overhead coiling door formed with curtain of interlocking metal slats. Insulation items that follow apply only to the insulated doors.

C. Operation Cycles: Door components and operators capable of operating for not less than 100,000 cycles.

D. Curtain R-Value: 5.0 deg F x h x sq. ft./Btu.

E. Door Curtain Material: Galvanized steel.

F. Door Curtain Slats: Flat profile slats.
   1. Insulated-Slat Interior Facing: Metal.

G. Bottom Bar: Two angles, each not less than 1-1/2 by 1-1/2 by 1/8 inch; fabricated from hot-dip galvanized steel and finished to match door.

H. Curtain Jamb Guides: Galvanized steel with exposed finish matching curtain slats.

I. Hood: Match curtain material and finish.
   1. Provide internal hood baffle weatherseal (Addendum 3)
J. Locking Devices: Equip door with slide bolt for padlock.

K. Manual Door Operator: Motor Operation

L. Electric Door Operator:
   1. Usage Classification: Heavy duty, 25 or more cycles per hour and more than 90 cycles per day.
   2. Safety: Listed according to UL 325 by a qualified testing agency for commercial or industrial use.
   4. Motor Electrical Characteristics:
      a. Horsepower: 1 hp.
      b. Voltage: 208-V ac, single phase, 60 Hz.
   6. Obstruction-Detection Device: Automatic electric sensor edge on bottom bar.
   7. Control Station(s): Interior mounted.

M. Curtain Accessories: Equip door with weatherseals.

N. Door Finish:
   1. Baked on polyester finish (Addendum 3): Color as selected by Architect from manufacturer's full range for exterior and interior (insulated doors) slats

2.3 MATERIALS, GENERAL

A. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a qualified testing agency, and marked for intended location and application unless noted otherwise.

2.4 DOOR CURTAIN MATERIALS AND CONSTRUCTION

A. Door Curtains: Fabricate overhead coiling-door curtain of interlocking metal slats, designed to withstand wind loading indicated, in a continuous length for width of door without splices. Unless otherwise indicated, provide slats of thickness and mechanical properties recommended by door manufacturer for performance, size, and type of door indicated, and as follows:

   1. Insulation: Fill slats for insulated doors with manufacturer's standard thermal insulation complying with maximum flame-spread and smoke-developed indexes of 75 and 450, respectively, according to ASTM E 84 or UL 723. Enclose insulation completely within slat faces.
   2. Insulated metal Interior Curtain-Slat Facing: Match metal of exterior curtain-slat face.

B. Curtain Jamb Guides: Manufacturer's standard angles or channels and angles of same material and finish as curtain slats unless otherwise indicated, with sufficient depth and strength to retain
curtain, to allow curtain to operate smoothly, and to withstand loading. Slot bolt holes for guide adjustment. Provide removable stops on guides to prevent overtravel of curtain.

2.5 HOODS

A. General: Form sheet metal hood to entirely enclose coiled curtain and operating mechanism at opening head. Contour to fit end brackets to which hood is attached. Roll and reinforce top and bottom edges for stiffness. Form closed ends for surface-mounted hoods and fascia for any portion of between-jamb mounting that projects beyond wall face. Equip hood with intermediate support brackets as required to prevent sagging.

2.6 LOCKING DEVICES

A. Slide Bolt: Fabricate with side-locking bolts to engage through slots in tracks for locking by padlock, located on both left and right jamb sides, operable from coil side.

B. Chain Lock Keeper: Suitable for padlock.

C. Safety Interlock Switch: Equip power-operated doors with safety interlock switch to disengage power supply when door is locked.

2.7 CURTAIN ACCESSORIES

A. Weatherseals for Exterior Doors: Equip each exterior door with weather-stripping gaskets fitted to entire exterior perimeter of door for a weather-resistant installation unless otherwise indicated.

B. Astragal for Interior Doors: Equip each door bottom bar with a replaceable, adjustable, continuous, compressible gasket of flexible vinyl, rubber, or neoprene as a cushion bumper.

2.8 COUNTERBALANCE MECHANISM

A. General: Counterbalance doors by means of manufacturer's standard mechanism with an adjustable-tension, steel helical torsion spring mounted around a steel shaft and contained in a spring barrel connected to top of curtain with barrel rings. Use grease-sealed bearings or self-lubricating graphite bearings for rotating members.

B. Brackets: Manufacturer's standard mounting brackets of either cast iron or cold-rolled steel plate.

2.9 MANUAL DOOR OPERATORS

A. General: Equip door with manual door operator by door manufacturer.

B. Chain-Hoist Operator: Consisting of endless steel hand chain, chain-pocket wheel and guard, and gear-reduction unit with a maximum 30-lbf force for door operation. Provide alloy-steel hand chain with chain holder secured to operator guide.
2.10 ELECTRIC DOOR OPERATORS

A. General: Electric door operator assembly of size and capacity recommended and provided by door manufacturer for door and operation-cycles requirement specified, with electric motor and factory-rewired motor controls, starter, gear-reduction unit, solenoid-operated brake, clutch, control stations, control devices, integral gearing for locking door, and accessories required for proper operation.

1. Comply with NFPA 70.
2. Control equipment complying with NEMA ICS 1, NEMA ICS 2, and NEMA ICS 6, with NFPA 70 Class 2 control circuit, maximum 24-V ac or dc.

B. Usage Classification: Electric operator and components capable of operating for not less than number of cycles per hour indicated for each door.

C. Motors: Reversible-type motor with controller disconnect switch for motor exposure indicated for each door assembly.

1. Electrical Characteristics: Minimum as indicated for each door assembly. If not indicated, large enough to start, accelerate, and operate door in either direction from any position, at a speed not less than 8 in./sec. and not more than 12 in./sec., without exceeding nameplate ratings or service factor.
2. Operating Controls, Controllers, Disconnect Switches, Wiring Devices, and Wiring: Manufacturer's standard unless otherwise indicated.

D. Obstruction-Detection Devices: External entrapment protection consisting of indicated automatic safety sensor capable of protecting full width of door opening. For non-fire-rated doors, activation of device immediately stops and reverses downward door travel.

1. Electric Sensor Edge: Automatic safety sensor edge, located within astragal or weather stripping mounted to bottom bar. Contact with sensor activates device. Connect to control circuit using manufacturer's standard take-up reel or self-coiling cable.
   a. Self-Monitoring Type: Four-wire-configured device designed to interface with door operator control circuit to detect damage to or disconnection of sensor edge.

E. Control Station: Three-button control station in fixed location with momentary-contact push-button controls labeled "Open" and "Stop" and sustained- or constant-pressure push-button control labeled "Close."

1. Interior-Mounted Units: Full-guarded, surface-mounted, heavy-duty type, with general-purpose NEMA ICS 6, Type 1 enclosure.

G. Emergency Operation Disconnect Device: Equip operator with hand-operated disconnect mechanism for automatically engaging manual operator and releasing brake for emergency manual operation while disconnecting motor without affecting timing of limit switch. Mount
mechanism so it is accessible from floor level. Include interlock device to automatically prevent motor from operating when emergency operator is engaged.

H. Motor Removal: Design operator so motor may be removed without disturbing limit-switch adjustment and without affecting emergency manual operation.

I. Audible and Visual Signals: Audible alarm and visual indicator lights in compliance with the accessibility standard.

PART 3 - EXECUTION

3.1 INSTALLATION

A. Install overhead coiling doors and operating equipment complete with necessary hardware, anchors, inserts, hangers, and equipment supports; according to manufacturer's written instructions and as specified.

B. Power-Operated Doors: Install automatic door openers according to UL 325.

3.2 DEMONSTRATION

A. Engage a factory-authorized service representative to train Owner's maintenance personnel to adjust, operate, and maintain overhead coiling doors.

END OF SECTION
SUBSTITUTION REQUEST
(During The Bidding Phase)

Project: STORAGE BUILDING & PARKING

Substitution Request Nbr: ____________________________

From: ____________________________

Date: 2/12/21

A/E Project Number: ____________________________

Contract For: ____________________________

To: ____________________________

Re: ____________________________

Specification Title: LED INTERIOR AND EXTERIOR LIGHTING

Section: 205110 AND 205010 Page: ____________________________

Description: ____________________________

Article/Paragraph: ____________________________

Proposed Substitution: ALL LIGHTING AS LISTED IN ATTACHED SUBMITTAL DOCUMENTS FOR COMPETITIVE BID.

Manufacturer: AS LISTED

Address: ____________________________ Phone: ____________________________

Trade Name: ____________________________ Model No: ____________________________

Attached data includes product description, specifications, drawings, photographs, and performance and test data adequate for evaluation of the request; applicable portions of the data are clearly identified.

Attached data also includes a description of changes to the Contract Documents that the proposed substitution will require for its proper installation.

The Undersigned certifies:

- Proposed substitution has been fully investigated and determined to be equal or superior in all respects to specified product.
- Same warranty will be furnished for proposed substitution as for specified product.
- Same maintenance service and source of replacement parts, as applicable, is available.
- Proposed substitution will have no adverse effect on other trades and will not affect or delay progress schedule.
- Proposed substitution does not affect dimensions and functional clearances.
- Payment will be made for changes to building design, including A/E design, detailing, and construction costs caused by the substitution.

A/E's REVIEW AND ACTION

☐ Substitution approved - Make submittals in accordance with Specification Section 01330.

☒ Substitution approved as noted - Make submittals in accordance with Specification Section 01330. SL2/P is to support two fixtures at 180 deg.

☐ Substitution rejected - Use specified materials.

☐ Substitution Request received too late - Use specified materials.

Signed By: ____________________________ Date: 02/19/21

Supporting Data Attached: ☐ Drawings ☐ Product Data ☐ Samples ☐ Tests ☐ Reports
ELECTRONIC BID PROPOSAL instructions - EXCEL SPREADSHEET
PROJECT NO: TMUAW-16-02, TO-05 & TO-6

Please read the following instructions carefully:
1. After opening this file re-save it as your company’s name.
2. Open the BID FORM Sheet from the tabs below.
3. Input the unit price of the appropriate pay item in the cells highlighted in blue.
4. Review all data input and check calculations to ensure accuracy of Bid.
5. Print three copies of the "PROPOSAL" tab, BID FORM and the "SIGNATURE PAGE" tab.
6. Complete and sign the "Signature Page" document.
7. Submit hard copy and electronic disk with Contract Documents and Specifications for Bid opening date.

AGREEMENT FOR USING ELECTRONIC BID PROPOSAL

By and Between:

(ENGINEER) and RECIPENT. The enclosed electronic media is provided pursuant to your request and is for your limited use in connection with your submission of Bid Proposal for Project No. TMUAW-16-02, TO-05 & TO-6. In no event shall the information be used for any other purpose or be released to third parties without the written consent of the ENGINEER. In the event of a discrepancy between the hard copy and this electronic media at delivery or in the future, the hard copy shall govern. ENGINEER hereby disclaims any and all liability for the consequences from use of the electronic media and makes no warranty or guarantee of accuracy. RECIPENT shall assume full responsibility for the uses and consequences of the electronic media. It is agreed that ENGINEER has and retains ownership of the electronic media. ENGINEER does not warrant or guarantee that the electronic data is compatible with RECIPENT’S computer hardware or software, and ENGINEER’S responsibility for the electronic media is limited to replacement of defective media for a period of thirty (30) days after delivery to RECIPENT.!! By opening and using this FILE, YOU AGREE to these TERMS AND CONDITIONS!!
TO: HONORABLE MAYOR
CITY OF TULSA, OKLAHOMA

THE UNDERSIGNED BIDDER, having carefully examined the drawings, specifications, and other Contract Documents of the above project presently on file in the City Clerk, City of Tulsa Oklahoma:

CERTIFIES THAT he has inspected the site of the proposed work and has full knowledge of the extent and character of the work involved, construction difficulties that may be encountered, and materials necessary for construction, class and type of excavation, and all other factors affecting or which may be affected by the specified work; and

CERTIFIES THAT he has not entered into collusion with any other bidder or prospective bidder relative to the project and/or bid; and

HEREBY PROPOSES: to enter into a contract to provide all necessary labor, materials, equipment and tools to completely construct and finish all the work required by the Contract Documents referred to therein; to complete said work within 210 calendar days after the work order is issued; and to accept in full payment therefore the amount set forth below for all work actually performed as computed by the Engineers as set forth in the Contract.

Basis of Award
THE BID PROPOSAL INCLUDES ROADWAY & ARCHITECTURAL BASE BID WITH TWO STORMWATER MATERIAL OPTIONS AND ADD ALTERNATE 1. IT SHOULD BE NOTED THAT THE LOWEST RESPONSIBLE TOTAL BIDS SHALL BE DETERMINED BY THE TOTAL BASE BID PLUS THE LOWER OF THE STORMWATER MATERIAL OPTIONS PLUS ADD ALTERNATE 1. ANY PROPOSAL SUBMITTED WITH EITHER STORMWATER MATERIAL OPTION AND ADD ALTERNATE 1 INCOMPLETE SHALL BE CONSIDERED NON-RESPONSIVE. THE CITY OF TULSA RESERVES THE RIGHT TO SELECT EITHER MATERIAL OPTION IN THE EVENT THE BID COSTS OF THE TWO MATERIAL OPTIONS ARE EQUAL. THE ITEM IN ADD ALTERNATE 1 MAY OR MAY NOT BE INCLUDED IN THE CONTRACT AWARD AT THE SOLE DISCRETION OF THE CITY OF TULSA.
