ADDENDUM NO. 2

TO

PROJECT NO. 144017-AO & 144019 PHASE 6B – ARTERIAL STREET REHABILITATION S. DETROIT AVE FROM ARCHER ST. TO E. 13TH ST.

This Addendum No. 2 consisting of one (1) item, submitted by Poe and Associates is hereby made a part of the Contract Documents to the same extent as though it were originally included therein and shall supersede anything contained in the Plans and Specifications with which it might conflict. **All addenda to the contract documents should be denoted on the last page of the Proposal in the space provided.**

This Addendum No. 2 consists of the following:

1. Delete the existing bid proposal form in its entirety and replace with the revised Bid Proposal located at: <https://www.cityoftulsa.org/government/departments/public-works/engineering-services/construction-bids/>. It is the Bidder's responsibility to download the revised Bid Proposal.

All other provisions of the Plans and Specifications shall remain in full force and effect.

ADDENDUM NO. 1
TO
S. DETROIT AVE. - E. ARCHER ST. TO E. 13TH ST.
PROJECT NOS. 144017ao & 144019 PHASE 6B

This Addendum No. 1 consisting of One (1) item, submitted by Poe and Associates, Inc., is hereby made a part of the Contract Documents to the same extent as though it was originally included therein and shall supersede anything contained in the Plans and Specifications with which it might conflict.

This Addendum No. 1 consists of the following:

1. Provide revised Electronic Bid Form with revised Quantities.
 - Bid item 79, CAT 6 Ethernet Cable, quantity is revised from 1 EACH to 2 EACH.

Clarification is provided below:

Pay Item #82 is specifically for interconnect (permanent traffic signal communications downtown) and is an allowance that covers the conduit and Cat 6 cable needed for any interconnect that is damaged and needs to be replaced.

Pay Item #79 is for Cat 6 cable associated with temporary communications equipment that will be needed until all damaged interconnect(s) and cabling can be replaced and are working properly. This pay item is correctly corresponding to TO-6 and TO-7. The quantity is listed as Each, because it will be per each wireless traffic signal communications system, see specification section 622. When this pay item is used, there will need to be a minimum quantity of 2, instead of 1, because it will affect at least 2 traffic signals when needed. The contractor will need to include enough CAT 6 cable in their estimate to run from the controller to the signal pole at the furthest corner of the intersection to connect to the wireless communications equipment.

All other provisions of the Plans and Specifications shall remain in full force and effect.
