# NEIGHBORHOOD CONDITIONS INDEX

NEIGHBORHOOD CONDITIONS INDEX

What is the Neighborhood Conditions Index (NCI)?

The Neighborhood Conditions Index is a tool that can help Tulsans quickly and easily understand areas where their neighborhoods are excelling, and where there is opportunity to improve.

How can we access NCI Reports?

tulsaplanning.org/nci → "Interactive map with reports" → Select your neighborhood, or type an address into the address box → "View report"

How can we read a report?

Page 1
- Area description, location, and a zoomed-in map
- Three top and bottom scoring categories for your neighborhood
- Categories informed by our city's comprehensive plan

Page 2-3
- Analysis of the Neighborhood Statistical Area (NSA), to the nine chapters of the comprehensive plan
- Scores compare individual NSA to the scores of all NSAs in the city

Page 4
- Demographic
- Economic
- Public service data
- Neighborhood groups

Page 5-7
- Data point in each category
- Brief explanation
- How it was analyzed

Page 8
- Large map of Tulsa
- All of the city's NSAs
- Council districts

How do we choose priorities?

Ask important questions like:

- What will impact the quality of life in our neighborhood?

- What are our neighbors and partners motivated to change?

- What changes can we make this week? This month? This year?

- What resources do we have access to?

How do we access resources?

tulsaplanning.org/nci → NCI Resource Center → Select a category → Select a data point → Actions and resources

NEIGHBORHOOD CONDITIONS INDEX

Name: _____ Date: _____

Neighborhood: _____ NSA: _____

What do we want to work on?
_____
