Reed Park
4233 S. Yukon

JULY 29
Whiteside Park
4009 S. Pittsburg

AUGUST 5
Church of Saint Benedict
2200 W. Ithica St., BA

*Note: These are not certified classes required for childcare or health care providers.

02 SURPLUS AUCTION

BID ON CITY PROPERTY ITEMS

Looking for something used but still usable? Many items will be up for bids at the next City of Tulsa Surplus Property Auction on Saturday, June 10, starting at 9:30 a.m. at the City’s surplus facility, 108 N. Trenton Ave. That facility is located two blocks north and one block west of the I-244 and Utica Avenue intersection.

Prior to the sale, you may preview the merchandise Friday, June 9, from 9 a.m. to 4 p.m. or Saturday, June 10 at 7:30 a.m. Photos of the merchandise also can be viewed online by visiting: www.chuppsauction.com

Surplus vehicles, office equipment/furniture and police property-room items will be included in the sale. All sales are “as is.” It is the bidder’s responsibility to determine the condition of the merchandise. Three auctioneers may be selling simultaneously, so bidders wanting to bid on multiple items need to bring a partner/proxy. No one under the age of 16 may be admitted to the City surplus property facility.

Cash, MasterCard and Visa cards are accepted. Checks can be accepted only if accompanied by a letter of guaranty from the financial institution on which the check is drawn. Payment is required in full within one hour after the auction ends. An Oklahoma Tax Commission auditor may be present.

If you have questions about the auction, please call (918) 596-7233.

03 FLOOD AWARENESS

Get flood insurance, know your risk and be prepared for possible flooding.

04 BASIC METER READING

Learn how to read your water meter and check for possible leaks at home.

+ PLUS: KEEP PET WASTE OUT OF STORM RUNOFF
**READING A METER**

**SIMPLE WAYS TO CHECK FOR LEAKS**

Does your water bill seem high? Do you suspect a leak? Here are some ways to check your water meter for billing accuracy or water leaks:

**Where is My Water Meter?** It's probably in your front yard, in the grass, near the street, or in the back yard/side yard. Look for a cast iron lid on the ground with the words “water meter.” Remove the lid to expose the meter, which is about 12 inches into the ground. Once finished, replace the lid securely.

**What Do the Dials Mean?** The large dial with the red hand shows volume in 1 – 10 gallons. If no water is being used, the leak indicator (small red triangle) should not be moving. If everything is turned off on the property and the triangle is still moving, then a leak may be possible.

**What Do the Numbers Mean?** The first digits on the white background measure water use by 1,000 gallons and are read for billing each month. The black background digits on the right side show the one gallon, 10-gallon, and 100-gallon amounts, which carry over to the next month's billing.

**How Is My Meter Read?** Simply read the numbers shown on the odometer (this records total water usage) from left to right to take your meter reading. Every turn of a black number measures 1,000 gallons. Every turn of a white number in the first black register measures 100 gallons. The second black register measures in 10 gallons. The “0” at the end is the place holder.

**How Do I Check for Leaks?** Look for dripping faucets, showerheads and fixture connections. Tighten pipe connections and replace fixtures if necessary. Leaking faucets, running toilets and other leaks can account for more than 10,000 gallons of water per year in an average home. To check for a toilet leak, put a few drops of food coloring in the tank and see if it appears in the toilet bowl before you have flushed. Also check for leaks in your irrigation systems and outside spigots.

**If** you would like help finding or fixing a water leak, call a plumber. **If** you suspect an error in your bill, call the Customer Care Center at (918) 596-9511.
